

Tiny Home on the Water

Berlin, Germany

Design
Crossboundaries

Completion & Construction Time
2022 - 16 months

Client
Marianne Friese

GFA
62 m²

Design Task
Transform a boat into a tiny home

Photographer
Johanna Link

Crossboundaries has redesigned a solar-powered motorboat, incorporating high-end tiny-home features, ideal for slow-paced travel. Measuring about 15 meters in length and 4 meters in width, it comprises interconnected multi-purpose areas. Key design elements include a flip-over bed that conceals the helm stand, a folding kitchen table, and a pull-out desk, making the space both practical and adaptable. This sustainable, floating tiny home represents a shift toward minimalist, flexible living, offering high-quality spaces that seamlessly adapt to modern needs.
